(+92) 309 6855375

Full Stack Software Engineer with over 4 years of experience, a keen aptitude for problem solving and a proven track record of building high-performance MVPs for various startups.

## Work Experience

---

**Senior Software Engineer**  
SmashCloud

Jul 2022 - Present

- Led the front-end development and collaborated on DevOps for a Fortune Global 500 venture in a lead engineering role.
- Developed crucial features for a widely adopted tenant turnover management system, streamlining operations for some of the top student housing owners across North America.

**Software Engineer**  
Pursue Today

Mar 2021 - Jun 2022

- Developed *pribox.io*, a SaaS product for tracking and improving email deliverability and domain reputation, acting as its sole engineer during most of the MVP stage.
- Wrote automated planning and task scheduling services that closely interacted with SMTP and IMAP protocols.

**Full Stack Engineer**  
BookOtto

Jul 2020 - Mar 2021

- Prototyped and developed the flagship MVP using React Native and GraphQL.
- Helped create and maintain the AWS backend and DevOps infrastructure.
- Developed CRM and document management solutions to optimize operations in the NYC real estate market.

**React Native Developer**  
MoneyWhere

Mar 2019 - Dec 2019

- Developed core fintech MVP using React Native and Node.js.
- Implemented a virtual currency system, payments, geolocation services, and advanced map capabilities.
